Mission

Objectives

To elaborate on the governance and leadership in our institution, it is appropriate to quote Prof. W. Edwards Demming, a renowned educationist who has observed, "to create a quality institution and quality climate, we must remember that we work hard for those we care for, and for those whom we respect and whom trust us, those with whom we laugh, those who allow us to think and act for ourselves, and those who help make our lives more secure". This is precisely how the students of any progressive institution should view their teachers and how, the teachers in turn should view the management. Our teachers work with empathy and vision to create better citizens of the future. Strategy developed and deployed is broadly divided into two parts. Firstly, where the teacher constantly reminds the student that the real purpose of gathering information is to

apply it and secondly, that the students are made to feel what they are learning is relevant to them and that they should be in a position to apply that knowledge productively and judiciously. We take an interdisciplinary approach, where teachers collaborate amongst themselves, in each other's subject, and try to draw a correlation between them. The mobilization of resources to maintain and run such an institution of high quality is done partly through salary grant, central assistance from the UGC and donations from the management.
